# RESPONSE TO NOTIFICATION OF NON-COMPLIANT APPEAL BRIEF PURSUANT TO 37 C.F.R. § 41.37

Dear Sir:

In response to the Notification of Non-Compliant Appeal Brief mailed October 2, 2008,

Appellants submit the following amended Section V: Summary of Claimed Subject Matter.

#### CERTIFICATE OF TRANSMISSION

I hereby certify that this Response to Notification of Non-Compliant Appeal Brief Pursuant to 37 C.F.R.  $\S$  41.37 is, on the date shown below, being transmitted to the U.S. Patent and Trademark Office via the Office's electronic filling system EFS-Web addressed to the Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

## V. SUMMARY OF CLAIMED SUBJECT MATTER

This invention relates to a wing mirror unit (Figs. 1-2) for a vehicle. <sup>1</sup> As set forth in independent claim 11, the wing mirror unit (Figs. 1-2) comprises a base plate (2—Figs. 1-2) and a supporting frame (5—Figs. 1-2) pivotally connected to the base plate (2—Figs. 1-2) about a main pivot (4—Figs. 1-2) and an auxiliary pivot (8—Figs. 1-2). <sup>2</sup> The wing mirror unit (Figs. 1-2) further comprises an actuator including an engaging part connected to the supporting frame (5—Figs. 1-2). <sup>3</sup> The actuator (1—Figs. 1-2) is connected to the main pivot (4—Figs. 1-2) and configured to move the main pivot (4—Figs. 1-2) in a linear path further outwardly from the vehicle than the auxiliary pivot (8—Figs. 1-2). <sup>4</sup>. The supporting frame (5—Figs. 1-2) is pivotal with respect to the base plate (2—Figs. 1-2) between a folded orientation in which the supporting frame (5—Figs. 1-2) substantially abuts along a body (3—Figs. 1-2) of the vehicle and an unfolded orientation in which the supporting frame (5—Figs. 1-2) is substantially oriented transversely to the body (3—Figs. 1-2) of the vehicle. <sup>5</sup> The engaging part is adjustable between a first orientation located near the body (3—Figs. 1-2) of the vehicle and a second orientation located farther outward with respect to the body (3—Figs. 1-2) of the vehicle. <sup>6</sup>

As set forth in independent claim 25, the wing mirror unit (Figs. 1-2) include a base plate (2—Figs. 1-2), a supporting frame (5—Figs. 1-2), a means for pivoting the supporting frame

<sup>&</sup>lt;sup>2</sup> See Specification at page 4, lines 4-8 and 11-14.

<sup>&</sup>lt;sup>3</sup> See Specification at page 4, lines 11-13 and 15-16.

<sup>&</sup>lt;sup>4</sup> See Specification at page 4, lines 15-16 and page 6, lines 9-12.

<sup>&</sup>lt;sup>5</sup> See Specification at page 4, lines 11-14 and 16-21.

<sup>&</sup>lt;sup>6</sup> See Specification at page 4, lines 25-28.

(5—Figs. 1-2) with respect to the base plate (2—Figs. 1-2).<sup>7</sup> The wing mirror unit (Figs. 1-2) further includes an actuator including an engaging part that operatively engages the supporting frame (5—Figs. 1-2).<sup>8</sup> The means for pivoting the supporting frame (5—Figs. 1-2) includes a main pivot (4—Figs. 1-2) for pivoting the supporting frame (5—Figs. 1-2) from a folded orientation to an unfolded orientation and an auxiliary pivot (8—Figs. 1-2) for pivoting the supporting frame (5—Figs. 1-2) with respect to the base plate (2—Figs. 1-2).<sup>9</sup> The main pivot (4—Figs. 1-2) is configured to move in a linear path further outwardly from the vehicle than the auxiliary pivot (8—Figs. 1-2).<sup>10</sup>

As set forth in independent claim 32, the wing mirror unit (Figs. 1-2) include a body portion (3—Figs. 1-2), a base plate (2—Figs. 1-2) extending from the body portion (3—Figs. 1-2), an actuator including an engaging part, and a supporting frame (5—Figs. 1-2) pivotally connected to the actuator about a main pivot (4—Figs. 1-2) and pivotally connected to the base plate (2—Figs. 1-2) about an auxiliary pivot (8—Figs. 1-2). The engaging part supports the main pivot (4—Figs. 1-2) and the position of the main pivot (4—Figs. 1-2) is adjustable inwardly and outwardly with respect to the body (3—Figs. 1-2) of the vehicle such that the main pivot point (4—Figs. 1-2) is configured to move from a position that is closer than the auxiliary

<sup>10</sup> See Specification at page 6, lines 9-12.

<sup>11</sup> See Specification at page 4, lines 4-14.

pivot (8—Figs. 1-2) to the vehicle <sup>12</sup> to a position that is further outwardly from the vehicle than the auxiliary pivot (8—Figs. 1-2). <sup>13</sup>
